

12 x 12

Typically, the FIRST number of a measurement represents the WIDTH and the SECOND number represents the HEIGHT. Sometimes these numbers are reversed, so check each sketch and set of measurements before you start cutting paper.

When converting the numbers from decimals to fractions, you may lose or gain a bit of dimension - keep this in mind if you are combining cuts of paper to expand across a layout. You may want to err on the side of a little too big vs a little too small.

When converting a square sketch to a rectangular sketch, the overall design will be distorted..

Decimal to Fraction Chart

Decimal	Inch
0.13	1/8
0.25	1/4
0.38	3/8
0.50	1/2
0.63	5/8
0.75	3/4
0.88	7/8
1.00	1

How to use this chart:

1. Start with the 12x12 sketch with measurements.
2. Look up the measurements listed on the sketch in the 12x12 column.
3. Select the corresponding measurement depending on your layout size.
4. Cut the element according to the conversion number.

Example: A 4x6" photo on a 12x12 layout would convert to a 2.67 x 4" photo on an 8x8 layout. Use the Decimal to Fraction Chart to determine that a 2.67" measurement is close to 2-5/8".

Decimal to Fraction Chart

Decimal	Inch
0.13	1/8
0.25	1/4
0.38	3/8
0.50	1/2
0.63	5/8
0.75	3/4
0.88	7/8
1.00	1

How to use this chart:

1. Start with the 12x12 sketch with measurements.
2. Look up the measurements listed on the sketch in the 12x12 column.
3. Select the corresponding 6.75 or 10 inch measurement.
4. Cut the element according to the conversion number.

Example: A 4x6" photo on a 12x12 layout would convert to to a 2.25 x 5 photo on a 6.75 x 10 layout. Use the Decimal to Fraction Chart to determine that a 2.25" measurement is the same as 2-1/4".

Decimal to Fraction Chart

Decimal	Inch
0.13	1/8
0.25	1/4
0.38	3/8
0.50	1/2
0.63	5/8
0.75	3/4
0.88	7/8
1.00	1

How to use this chart:

1. Start with the 12x12 sketch with measurements.
2. Look up the measurements listed on the sketch in the 12x12 column.
3. Select the corresponding 8.5" or 10" measurement.
4. Cut the element according to the conversion number.

Example: A 4x6" photo on a 12x12 layout would convert to to a 2.83 x 5.5 photo on an 8.5x11 layout. Use the Decimal to Fraction Chart to determine that a 2.83" measurement is close to 2-7/8" .
