

### Cut & Score Corner Borders

Start with 6x6 square piece of designer paper.

1. **BLACK LINE - STRAIGHT BLADE** - Trim 6x6" square in half diagonally to create two triangles.
2. **RED LINES - DECORATIVE BLADE** - Feed one triangle into trimmer. Line up **LONGEST SIDE** at 1.75 inches and trim with decorative blade of choice.
3. **BLUE LINES - SCORING BLADE** - use scoring blade to create fold line 0.5" from the decorative edge of each piece. Fold back decorative edge on each piece.

### Page Assembly

1. Adhere smaller triangle in corner approximately 1/8" from edge on both sides.
2. Use a border of your choice to help space the second, larger section of the triangle.
3. Repeat in opposite corner.

Use a second 6x6 square to make another pair of corner borders for a 2 page layout. You can also experiment with different sizes of squares.
