

SUPPLIES

- Chain-style BMCs
- Border Maker System Cartridge Holder
- Cardstock
- 12-Inch Trimmer

The samples above were originally created in January 2021 when I was a member of the Creative Life Scrapbooking Design Team.

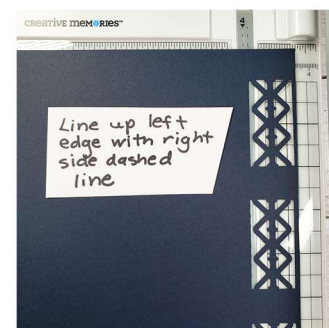

Using a chain-style BMC, line up the cardstock with the outside of the cartridge holder and punch.

Slide the BMC over and line up the outside edge of the cartridge holder with the edge of the punched design and punch again.

Repeat the 2nd step two more times to punch four spaces on the 12-inch length of paper.

Line up the left edge of the punched design with the right-side dashed cutting line and then cut with straight blade.

To cut apart the blocks, line up the top and bottom edges of the design with the left edge of the gray cutting mat and cut with the straight blade.
