

From the September
2021 Virtual Crop

Made with the It's Fall,
Y'all collection (2021)

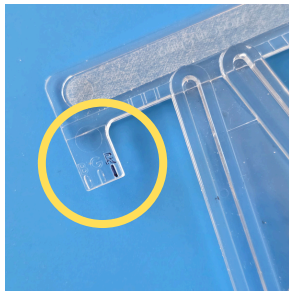

Photo 1: Look closely at the feet of your Border Cutting Tool to find the small R, G and B markings molded into the clear plastic. These markings correspond with the Red, Green and Blue blades of the Custom Cutting System.

TIP: I used a fine-tip black Sharpie to darken the molded R marking on my tool, making it much easier to see when positioning the tool.

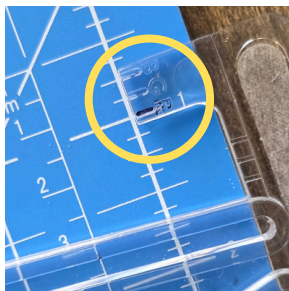

Photo 2: Use the R marking on the foot as a reference point when positioning your Border Cutting Tool on the 13x13 Custom Cutting System Mat.

When directions say to "align the R at the 1" mark," position the R marking directly over the 1" measurement line on the mat. This gives you a clear, repeatable reference point for consistent cuts.
